PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of coding experience and nearly 1 year of professional development experience. Developed and delivered 3+ projects from scratch across frontend, backend, APIs, databases, and deployment, with a focus on reliable, maintainable, and production-oriented applications.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Shadcn UI, Framer Motion, Figma

Backend & APIs: Node.js, Express.js, REST APIs, MVC Architecture, JWT Authentication

Databases & Cloud: MongoDB, PostgreSQL, Prisma ORM, Redis, Supabase, AWS EC2, AWS S3, Cloudflare, Nginx

Tools & Technologies: Git, GitHub, Postman, Stripe, Gemini APIs, Swagger, MCP Server, RabbitMQ, R2

PROFESSIONAL EXPERIENCE

MERN Stack Intern | May 2025 – Present

- Strengthened problem-solving and analytical skills through consistent practice with programming logic, array manipulation, and algorithmic exercises.
- Focused on developing real-world, production-oriented applications, applying frontend and backend development concepts to practical problems.
- Adapted to emerging technologies by integrating relevant tools and frameworks into project development.

PROJECTS

XeroCare | ERP & CRM Platform | October 2026 | Live: 15.252.52.227

Technologies: Next.js, Node.js, TypeScript, PostgreSQL, Redis, RabbitMQ, R2, JWT, Microservices Architecture

- Developing a microservices-based Enterprise Resource Planning (ERP) and Customer Relationship Management (CRM) platform for printer industry operations, integrating sales, rental, leasing, inventory, service, and financial workflows.
- Implemented rental and lease management modules to manage rental and leasing operations, agreements, lease tracking, and related business workflows.
- Implemented quotation management functionality to create and manage customer quotations and support the sales quotation lifecycle.
- Implemented accounts and financial management functionality to support accounting operations, financial transaction management, and centralized financial recordkeeping.
- Developing CRM and sales capabilities including lead management, customer 360-degree views, sales pipeline management, and customer relationship workflows.
- Building inventory and service capabilities including serial number tracking, multi-location stock management, purchasing workflows, Annual Maintenance Contract (AMC) management, service ticketing, and SLA monitoring.
- Implementing JWT authentication with refresh tokens, role-based access control (RBAC), two-factor authentication (2FA), and audit logging for secure multi-branch access.
- Engineering backend services with PostgreSQL, Redis, and RabbitMQ to support structured data management, caching, and asynchronous workflow processing.

Letsellr | Property Management Platform | October 2025 | Live: letsellr.in

Technologies: Next.js, Node.js, TypeScript, MongoDB, AWS EC2, AWS S3, Shadcn UI

- Built a full-stack property management platform for listing, tracking, and managing properties, improving client–contractor communication and operational workflows.
- Implemented AWS S3 signed URL uploads for image storage, reducing backend payload size by 80% and improving upload performance by 60%.
- Delivered the freelance project end to end, covering UI/UX design, backend development, and infrastructure.

InstaViz | AI-Powered Data Visualization Tool | November 2025

Technologies: Next.js, Node.js, MongoDB, TypeScript, MCP, Vercel, AWS EC2, Supabase, R2, Gemini APIs, JWT

- Built an AI-powered data visualization tool that transforms CSV data into dynamic charts and data insights.
- Used separate Gemini models for chart generation and conversational responses to optimize performance and token usage.
- Implemented an MCP server for CSV data aggregation, reducing redundant Gemini API requests and token usage by 50%.
- Implemented JWT access and refresh tokens, Google OAuth authentication, and Stripe payments.
- Built an admin dashboard with analytics for user activity and device-based login insights.
- Developed device-level session tracking to display active devices and support remote logout.

EDUCATION

Higher Secondary Education (Commerce) | Presidency College, Kunnamkulam | June 2017 – March 2019
